

RLC offers estimating services for electrical distribution, substation and transmission system projects. With extensive electrical project experience, RLC estimators provide estimates which assist clients in the entire project lifecycle decision making process. Project estimates can be tailored to meet the specific clients' needs and utilize industry standard software.

## ESTIMATING SERVICES

- Electrical infrastructure upgrade cost estimate
- New electrical infrastructure cost estimate
- Underground vs. overhead transmission line cost comparisons
- Cost estimates for validation of electric utility cost interconnects for Distribution Energy Resource (DER) projects
- Utility specific estimate
